## COPPETT HILL

### *A few facts about the Hill and its Management*

- At 100 hectares, it is Herefordshire's largest Local Nature Reserve.
- The Hill is a Common and some residents have 'Commoners Rights' to graze the hill and gather wood.
- Almost all maintenance tasks are undertaken by volunteers – these range from path maintenance and scrub clearance to tree planting and coppicing.
- Recent surveys show 350 different plant species growing on the Hill. The Hill is managed to encourage rare species of flora and fauna.
- It is a key site for three endangered butterfly species, including the Pearl Bordered Fritillary; their habitat is actively managed and numbers are increasing.
- The woodlands are actively managed, and coppicing of hazel has been re-introduced in selected areas.
- Permissive footpaths have been established which run the length of the Hill and provide circular walks with superb views. Guides produced by the Friends are sold at local shops and Tourist Information Centres
